

## **Project Development and Management for LED-solar lighting: off-grid applications (2003 - ongoing)**

**Client: Light Up The World (LUTW) Foundation, University of Calgary, Calgary of Alberta**

SGA provides services to this recognized international development NGO. Light Up The World Foundation (LUTW) is the pioneer and world leader in utilizing solid state lighting (SSL) technologies to enhance the quality of life of the poor in the developing world. SGA has helped LUTW establish an approach a local enterprise model that fosters sustainable livelihoods and economic development. LUTW installs ultra-efficient, durable and near permanent white LED lighting solutions using pico powered renewable energy systems in ecologically sensitive and remote rural areas.

SGA services include establishing management systems for product expediting and project management, preparing of proposals, product development planning as well as strategic planning. SGA has increased the effectiveness of this organization in delivering product and creating impacts to its clients in the developing world.
