

Project Development and Management for LED-solar lighting: off-grid applications (2003 - ongoing)

Client: Light Up The World (LUTW) Foundation

SGA provides services to a recognized international development NGO dedicated to providing low wattage, high intensity LED lighting powered by solar PV. SGA services include establishing management systems for product expediting and project management, preparing of proposals, and strategic planning.

With SGA assistance LUTW has increased its efficiency and project base 3 fold in just one year. Projects have been prepared and managed in a wide variety of off-grid developing country situations including:

- Sri Lanka tsunami disaster relief;
- Ghana
- Virunga Gorilla Conservation area; Congo, Rwanda, Uganda
- India - Untouchable lighting
- Cambodia
- Timor East reconstruction
